Press Release - 8.2.2003

Genestia Group, Inc - Neoxen Systems released Neoxen™ QX Framework R4.1.1

Genestia Group, Inc - Neoxen Systems, a global technology provider of system software, business applications and systems integration solutions, has today released a Maintenance Upgrade R4.1.1 for their Neoxen™ QX development platform.

Neoxen™ QX Framework is a powerful toolkit for rapid production of system software components and distributed multi-tier business applications for Microsoft® Windows® operating systems. It provides a solid foundation, which drastically shortens design and implementation time and significantly reduces the overall project and development costs.

Neoxen™ QX Framework is designed for project groups, systems integrators and independent software vendors for rapid system software development. Neoxen™ Professional Services uses it as a foundation technology in all the customer projects requiring a robust, fast and efficient platform.

"R4.1.1 contains compatibility enhancements and extensions in order to fully support the latest Service Packs in the Microsoft® environments. The ready-made project, server and client templates, which significantly shorten the time-to-market and time-to-money span, have been updated accordingly. The re-use oriented approach with fully tested ready-to-go business application skeletons offers competitive advantage and significant savings in development costs", says Esa Tervo, Chief Executive Officer at Genestia Group, Inc - Neoxen Systems. "As usually, Neoxen™ QX Framework is backwards compatible, allowing

existing applications to run unmodified and even to take advantage of the latest improvements in the framework."

Neoxen™ QX Framework R4.1.1 contains updated documentation, new functionality and updates in the auxiliary development tools. All the incremental updates and fixes since R4.1 are packaged and certified into a unified release.

Neoxen™ QX Framework R4.1.1 is available directly from the vendor. For more information about availability, licensing, upgrade policy and other sales related matters, please contact sales@neoxen.com.
