

**Press Release - 10/22/2002**

## **Genestia Group, Inc - Neoxen Systems released Neoxen™ QX Framework Release 4.1**

*Genestia Group, Inc - Neoxen Systems, a global technology provider for producing system software, business applications and systems integration solutions, has today released the Neoxen™ QX Framework Release 4.1 development platform.*

Neoxen™ QX Framework is a Software Development Kit (SDK) for rapid production of system software components and distributed multi-tier business applications for Microsoft® Windows® operating systems. Release 4.1 provides a solid foundation, which drastically shortens design and implementation time and significantly reduces the overall project costs.

Neoxen™ QX Framework is designed for project groups, systems integrators and independent software vendors for rapid system software development. Neoxen™ Professional Services uses it as a foundation technology in all the customer projects requiring a robust, fast and efficient platform.

“Release 4.1 contains ready-made project, server and client templates, which significantly shorten the time-to-market and time-to-money spans. This re-use oriented approach with fully tested ready-to-go business application skeletons offers competitive advantage and significant savings in development costs”, says Esa Tervo, Chief Executive Officer at Genestia Group, Inc - Neoxen Systems. “Neoxen™ QX Framework is backwards compatible, allowing existing applications to run unmodified and even to take advantage of the latest improvements in the framework.”

Neoxen™ QX Framework Release 4.1 contains new packaging, updated documentation, new functionality and new versions of the auxiliary development tools. All the incremental updates and fixes since R4.0 are packaged and certified into a unified release.

Neoxen™ QX Framework Release 4.1 is available directly from the vendor. For more information about availability, licensing, upgrade policy and other sales related matters, please contact [sales@neoxen.com](mailto:sales@neoxen.com).

## About Genestia Group

Genestia Group, Inc - Neoxen Systems is a global provider of intelligent software solutions that enable our users to innovate and create system software components and business applications with extreme ease and efficiency. Our royalty free software solutions based on our award winning Neoxen™ QX Framework are used to design, implement, build and distribute applications for in-house and commercial use. In addition we provide Professional Services for our corporate customers, including consultancy, implementation, integration, customization and training.

The vision of Neoxen Systems is to enable a new era in software technology, where our customers have the freedom to instantly create applications, deploy them on any platform, and integrate and manage them across the enterprise. The Global Village needs solutions to help its people to work more efficiently and faster with less effort than ever before.
