For Immediate Release

Press Release – 25th of March, 2013 - Turku, Finland

Neoxen takes learning technology to SQL Azure

Neoxen Systems has today announced official compatibility with Microsoft SQL Azure for their award-winning Learning Gateway product line.

Neoxen Learning Gateway, the Neoxen flag-ship product for educational institutions, is now officially supporting Microsoft SQL Azure for secure data storage. Among the first solutions in its market segment the new release offers an option to take advantage of the benefits provided by the most advanced cloud technologies – Microsoft Azure.

"Our ISV community is alive with innovation, and we're committed to helping our partners drive the next generation of software experiences," said **Ross Brown**, Vice President of ISV and Solutions Partners for the Worldwide Partner Group at **Microsoft**. "Adding compatibility for the latest Microsoft technologies helps ISVs to stay ahead of the competition and give their customers access to cutting-edge technologies."

"Compatibility with SQL Azure is a remarkable step ahead paving the way for our next generation cloud based services.", says **Tero Toropainen**, Technology Director at **Neoxen Systems**. "Our platform allows our customers to scale their usage according their needs even better than before. We already support Azure as a virtual data center and now we can streamline the system even further – and cut the costs of the infrastructure. This allows significant savings for our customers."

Building out an infrastructure for an educational institution that supports dynamic scalability can be expensive, complicated and time consuming. Forecasting the highest possible demand, building out the network to support peak times, getting the right servers in place at the right time, managing and maintaining the systems are non-trivial. **Windows Azure** is the Microsoft resolution to this challenge. Windows Azure is a foundation for running applications and storing data in the cloud - all in a secure environment with over 99.9% uptime.

Neoxen Systems - *Neoxen Systems is an established Finnish software company. We develop internationally certified learning and information management solutions for the educational market. We work closely with leading research centers and global technology providers to help you to succeed in your mission.*

Neoxen Systems is a long term Microsoft Gold Partner and Microsoft Authorized Office 365 Advisor. We are a leading Finnish expert in Windows Azure and Office 365 for the educational market.

The company is headquartered in Turku Science Park, the "Silicon Valley" of Southwest Finland.
