

For Immediate Release

Press Release – 13th of February, 2009 - Turku, Finland

Neoxen[®] QX Framework R10.0 - The “Omega” Release

Neoxen Systems has today announced the Next Generation Release of their award-winning 32/64-bit Foundation Platform designed for distributed business and communications solutions.

Neoxen QX Framework is the core of Neoxen QX technology and the foundation of all the Neoxen products. It is a powerful development kit for multi-platform system software and distributed multi-tier business and communications applications for Microsoft Windows and Linux/Unix operating systems. It scales from small hand-held devices to clustered Windows/Linux/Unix server environments.

“Release 10 is a remarkable major release with extensive set of new and improved functionality. New features include new management of structured and unstructured data, further extended protocol support, wider encryption support and support for C# and Microsoft .NET Framework”, says Sari Peltonen, Chief Technology Officer at Neoxen Systems. “Furthermore there is now full support for Microsoft Visual Studio 2008 Feature Pack and the latest trends in modern user interface development.”

Together with Visual Modus QX SDK it provides integration capabilities to Information Management solutions supporting Web Services, WebDav or any of the standard TCP protocols. It allows deep integration with Microsoft Office SharePoint 2007 and Bentley ProjectWise.

Neoxen QX Framework is fully internationalized and can be localized in any languages, including Chinese Simplified, Traditional Chinese, Japanese, Arabic and Hebrew.

Neoxen QX Framework is designed for project groups, systems integrators and independent software vendors for rapid system software development. Neoxen Professional Services uses it as a foundation technology in all the customer projects requiring a robust, high-performance platform.

For more information about availability, licensing, upgrade policy and other sales related matters, please contact sales@neoxen.com.
