Press Release – 16th of June, 2009 - Turku, Finland

Now Ready for Windows 7 and Windows Server 2008 R2

Neoxen Systems today announced new version of its application, **Neoxen Visual Modus for SharePoint**, and **Neoxen QX Framework**. Both work with **Microsoft Windows® 7** and **Microsoft Windows Server® 2008 R2** to offer customers enhanced security, as well as innovative user interface features and reliability improvements.

Neoxen Visual Modus for SharePoint is a Windows Desktop Explorer for SharePoint. It allows users to manage and share documents, e-mails and attachments, restructure folders and other resources stored in SharePoint sites.

"Our ISV community is alive with innovation, and we're committed to helping our partners drive the next generation of software experiences," said Ross Brown, Vice President of ISV and Solutions Partners for the Worldwide Partner Group at Microsoft. "Adding compatibility for the latest Microsoft operating systems helps ISVs to stay ahead of the competition and give their customers access to cutting-edge technologies."

"Neoxen Systems is excited to launch this new version of Neoxen Visual Modus for SharePoint," said Tero Toropainen, COO at Neoxen Systems. "Making our application compatible with Microsoft Windows 7 and Microsoft Windows Server 2008 R2 helps us offer our customers compelling benefits, including tools to keep them connected to data stored on the Web and sophisticated management features."

Neoxen Visual Modus for SharePoint is developed with **Neoxen QX Framework**. The just released version of Neoxen QX Framework is tested to work with Windows 7. Testing was conducted independently by VeriTest, a testing service of Lionbridge Technologies. The unique drag & drop features of Neoxen Visual Modus for SharePoint allow SharePoint and Windows 7 users drag & drop files between SharePoint sites, and drag & dropping e-mails and e-mail attachments into SharePoint.
