

## For Immediate Release

Press Release – 4<sup>th</sup> of January, 2011 - Turku, Finland

## Neoxen Technology now supports Microsoft SQL Azure

Neoxen Systems has today announced OEM Partner Availability of Release 10.14 of their award-winning QX Platform Products designed for distributed information management solutions.

[Neoxen QX Framework](#), the core of Neoxen QX technology and [Neoxen Trelox QX](#) products now contain a native interface to [Microsoft SQL Azure](#). Together they provide a powerful foundation for information management software and distributed multi-tier business and communications solutions for Microsoft Windows operating systems.

“Release 10.14 is a remarkable upgrade paving the way for integrating traditional and cloud computing”, says Sari Peltonen, Chief Technology Officer at Neoxen Systems. “As usually, Neoxen platform allows existing applications to run virtually unmodified and still take advantage of the new cloud technologies. Utilizing SQL Azure as the backend database engine allows our customers to scale their solutions with utmost flexibility, cost-efficiency and robustness.”

Together with the included [Visual Modus QX SDK](#) Neoxen platform products provide integration capabilities to any Information Management solutions, especially to [Microsoft SharePoint 2010](#).

Neoxen QX platform products are fully internationalized and can be localized in any languages, including Chinese Simplified, Traditional Chinese, Japanese, Arabic and Hebrew.

Neoxen QX products are designed for project groups, systems integrators and independent software vendors for rapid software development. Neoxen Professional Services uses them as foundation technology in all customer projects requiring a robust, high performance platform.
