

## For Immediate Release

Press Release – 9<sup>th</sup> of November, 2007 - Turku, Finland

### Neoxen<sup>®</sup> Trelox QX Multi-platform Edition

Neoxen Systems has today announced OEM Partner Availability of Release 9.0.0 of the 32/64-bit Embedded Application Server designed for integration and communications solutions.

Optimized for

Neoxen Trelox is a multi-platform embedded application server for both general and peer-to-peer communications and information integration. It is scalable, easy to deploy, integrated and interoperable with other applications. It is fully compliant with Microsoft server systems and now supports also **Novell SuSE Linux**. Neoxen Trelox is powered by Neoxen QX Framework as the Foundation Technology and it scales from small hand-held and embedded devices to clustered Windows/Linux server environments.

"Release 9 is a major milestone in Trelox history. New features in the Foundation allow it to be utilized in wide spectrum of devices", says Sari Peltonen, Chief Technology Officer at Neoxen Systems. "Our OEM Partners have already successfully piloted this new functionality in their mission-critical communications systems"

Neoxen Trelox QX is fully internationalized and can be localized in any languages, including Chinese Simplified, Traditional Chinese, Japanese, Arabic and Hebrew.

Neoxen Trelox QX is designed for project groups, systems integrators and independent software vendors for developing scalable communications systems. Neoxen Professional Services uses it together with Neoxen QX Framework as foundation technology in all the customer projects requiring a robust, high-performance platform.
