

For Immediate Release

Press Release – 23rd of February, 2009 - Turku, Finland

Neoxen Visual Modus QX - Windows Desktop Explorer for SharePoint OEM Edition

Neoxen Systems has today announced the next generation OEM Edition of their flagship product Visual Modus QX. This major release contains vast improvements and enhancements especially targeted for OEM customers.

Neoxen Visual Modus QX is a Windows Desktop Explorer for SharePoint. It provides native Windows desktop access for multiple SharePoint sites, sub sites, lists and folders. It allows users to manage and share documents, restructure folders and other resources stored in SharePoint. It supports drag & drop to and from email clients, local folders, FTP sites, network locations and any supported back-end systems.

OEM Customers Worldwide

Already many ISV's have integrated Visual Modus QX into their product portfolios. Visual Modus is widely customizable, including graphical look and feel, icons, program names, etc. It allows OEM customers to create a "**User Experience**", a look and feel to match their product portfolio requirements. Customers can also extend the menu system and toolbars, and create command add-ons. Dynamic multi-language support allows clients to use their **Industry Specific Terminologies** in Visual Modus QX menus.

"The basic customization can be done without programming. For ISV's there is a new comprehensive **SDK** to extend the system with **Microsoft Visual Studio 2008**.", says Tero Toropainen, Chief Operating Officer at Neoxen Systems. "Through the API the OEM clients can create custom functionality and integrate the product with almost any system."

Neoxen NaviList™ – Open Standards

Neoxen embraces open industry standards for interoperability. Visual Modus QX allows users to link documents, instructions, descriptions, web links or folder contents and to store them as logical **XML**-based NaviLists.

Together with **Neoxen EveryPlace™** OEM extensions, NaviLists integrate almost any desktop application with Microsoft Office SharePoint Server. This concept allows users to access the entire information stored in corporate infrastructure directly from their productivity tools.

Neoxen Systems - *Microsoft Gold Certified Partner and Microsoft Visual Studio Industry Partner - is a fast growing Finnish Software Company with out-of-the-box products and services with deep industry and business expertise. Neoxen has in-depth knowledge in information management and communications solutions and the latest technologies.*
