For Immediate Release

Press Release—27th of March, 2009 - Turku, Finland

Neoxen Visual Modus QX - Windows Desktop Explorer for SharePoint

Neoxen Systems has today announced the next generation release of their flagship product Visual Modus QX. This major release contains vast improvements and enhancements for Microsoft Office SharePoint 2007 users.

Neoxen Visual Modus QX is a Windows Desktop Explorer for SharePoint. It provides native Windows desktop access for multiple SharePoint sites, sub sites, lists and folders. It allows users to manage and share documents, restructure folders and other resources stored in SharePoint. It supports drag & drop to and from email clients, local folders, FTP sites, network locations and any supported back-end systems.

Neoxen® NaviLists™ - Structured Access to Multiple SharePoint Sites

Neoxen NaviLists display and link sets of information to logical and relevant contents. NaviLists are simple and effective in collecting and sharing sets of information which is scattered around team and corporate information systems. Neoxen NaviLists can also be personal. With NaviLists Neoxen Visual Modus brings information stored in SharePoint, ProjectWise, and other systems using standard file sharing and internet protocols, into the user's desktop.

"We're using SharePoint with Visual Modus and I strongly feel that these kinds of collaborative solutions are now essential when teams are scattered across the globe, often working on different projects at different times," says Maria Leinonen, COO at Lingsoft Inc. "Documents need to be available all the time, and communications centralized. That way it's easy to find the topics that have been discussed, what has been agreed, and where the project is headed."

Access Microsoft Office SharePoint Server 2007 (MOSS) from Any Application

Visual Modus QX integrates Microsoft SharePoint with the major content management systems, such as Bentley ProjectWise and Novell GroupWise at the users' desktop. All ODMA and WebDAV compatible content management and collaboration systems are supported.

Visual Modus QX operates as an integral part of Microsoft Office 2007. Together with **Neoxen® EveryPlace™** extensions, Visual Modus QX integrates almost any desktop application with Microsoft Office SharePoint.

Neoxen Systems - *Microsoft Gold Certified Partner and Microsoft Visual Studio Industry Partner - is a fast growing Finnish Software Company with out-of-the-box products and services with deep industry and business expertise.
