

**Press Release - 8/28/2003**

## **Genestia Group, Inc released Neoxen® QX Framework R4.1.3 for .NET**

*Genestia Group, Inc, an internationally operating technology and consulting company has today released a Maintenance Upgrade R4.1.3 for their Neoxen® QX development platform targeted for business applications and systems integration solutions.*

Neoxen® QX Framework is a powerful toolkit for rapid production of system software components and distributed multi-tier business applications for Microsoft® Windows® operating systems. It provides a solid foundation, which drastically shortens design and implementation time and significantly reduces the overall project and development costs.

Neoxen® QX Framework is designed for project groups, systems integrators and independent software vendors for rapid system software development. Neoxen Professional Services uses it as a foundation technology in all the customer projects requiring a robust, fast and efficient platform.

"R4.1.3 is a remarkable Maintenance Upgrade with extensive set of additions and fixes and it is fully backwards compatible. The documentation is updated and there is new more consistent packaging better supporting networked installations. Neoxen® Qwinux™ distribution of best-in-class Open Source development tools is included in the delivery as well as Neoxen® Modus Preview", says Esa Tervo, Chief Executive Officer at Genestia Group, Inc. "As usually, Neoxen® QX Framework allows existing applications to run virtually unmodified and even to take advantage of the latest improvements in the framework."

All the incremental updates and fixes since R4.1.2 are packaged and certified into a unified release.

Neoxen® QX Framework R4.1.3 is available directly from the vendor. For more information about availability, licensing, upgrade policy and other sales related matters, please contact [sales@neoxen.com](mailto:sales@neoxen.com).
