

For Immediate Release

Press Release – 1.4.2005

Software development power with Neoxen QX Framework 5.2 and Neoxen Qwined 5.2

Neoxen Systems, an internationally operating software vendor and consulting company has today released Release 5.2 of their Neoxen QX development platform with Neoxen Qwined programmers' editor.

"Release 5.2 is a remarkable upgrade with multiple new enhancements to user interface components and added functionality to the server components", says Esa Tervo, Chief Executive Officer at Neoxen Systems. The new features include restructured functionality, such as Centralized Configuration Management featuring transparent parameter storage and sharing between Windows Registry, initialization files and databases, Inet Server Framework and embedded HTTP daemon with HTTP 1.1, basic authentication, SSL and full CGI support.

In parallel Neoxen Systems released also another remarkable product - Neoxen Qwined Release 5.2 based on Neoxen QX Framework. This fully-featured developer's editor supports syntax highlighting for over twenty programming languages and configuration file formats out of the box. It has a built-in and customizable word and symbol auto completion for Windows and Web development, code folding, theme support and much more. "It can be extended easily by third parties and it can be localized virtually to any language. Neoxen Qwined offers much more than it demands. With its rich set of features it is a flexible tool to ease everyday development work", Esa Tervo continues.

Neoxen QX Framework is a powerful toolkit for rapid production of system software components and distributed multi-tier business applications for Microsoft® Windows® operating systems. It provides an internationalized small-footprint foundation, which drastically shortens design and implementation time and significantly reduces the overall project and development costs.

Neoxen QX Framework is designed for project groups, systems integrators and independent software vendors for rapid system software development. Neoxen Professional Services uses it as a foundation technology in all the customer projects requiring a robust, high-performance platform.

Neoxen QX Framework Release 5.2 is available directly from the [Neoxen Web Store](#) and Neoxen Qwined 5.2 is available for free from [Neoxen Downloads](#) site.
