Press Release – 12th of November, 2015 – Turku, Finland

Neoxen Enters in Smart Services in the Cloud

Neoxen Systems, the “Triple-D” certified provider of Microsoft Azure based information and learning management solutions, announces new level of support for emerging Smart Services for public sector and enterprises. Neoxen technology now certified for Hybrid and Public Clouds.

“For the past six months we have been working closely with the key standardization bodies and industry alliances, such as [AIOTI](#) assigned by the **European Commission**, to ensure we are on the right track with our technology. The new generation of connected services and embedded technologies goes through the whole society. This requires standards compliant and certified solutions. IoT, and digitalization in general, with smart urban development, new services for e-society and rapidly growing shift to smart appliances require trusted technology providers with proven track record.” tells **Esa Tervo**, CEO at **Neoxen Systems**. “We are happy to announce these new compliances to our customers and partners. High security, safety and verified compliance with the latest technologies and standards are fundamental requirements. Meeting the highest compliance levels in hybrid and public clouds are part of our long term strategy. As a cloud specialist, this approach enables us to continue to provide even wider range of connected smart services for public sector and industries alike.”

Microsoft Partner

Gold Application Development
Gold Intelligent Systems
Gold Data Analytics
Gold Data Platform
Gold Datacenter
Silver Cloud Platform

“Digitalization changes the world around us and the technologies evolve rapidly. Everything gets connected forming a foundation for real *Internet of Things*, *Smart Cities* and *Connected Enterprises*. Hybrid and public clouds are key enablers for smart and blended data as well as for smart enterprise mobility.” **Esa Tervo** continues: “[Microsoft Azure](#) is the global enterprise cloud leader and it has been the natural choice for our customers and partners. Therefore, passing the Hyper-V certifications together with Gold Competency Test for Windows Azure have been logical steps for us.”

Microsoft Azure is the only cloud platform named a leader in Gartner Magic Quadrants for IaaS, Application PaaS, and Cloud Storage. Azure is an open and flexible cloud platform that enables to quickly build, deploy, and manage applications across a global network of Microsoft-managed datacenters. Today over 57% of Fortune 500 companies are using Azure and the growth rate is impressive with 90,000 new Azure customer subscriptions every month.

The Alliance for the Internet of Things (AIOTI) was launched by the European Commission and various key IoT players. The AIOTI aims to give EU the lead in the Internet of Things (IoT) field creating a dynamic European IoT ecosystem. **Neoxen**

Systems is an active member in AIOTI community, especially in WG08 (**Smart Cities**) and WG09 (**Smart Mobility**) – [Press Release 10/26/2015](#).

neoxen[®] *Neoxen Systems is an established Finnish cloud software services company.
