Neoxen® QX Framework

Readme

Version Information

Version	10.58.039
Build Type	Release
Date	25.01.2016

Introduction

Neoxen QX Framework is a 32/64-bit Software Development Kit (SDK). It is the core of Neoxen QX technology and the foundation of all Neoxen products. It is a powerful development kit for distributed system software and multi-tier business and communications applications for multiple client and server operating systems. It scales from small hand-held devices to clustered server environments.

General Notes

What is New in this Release

- Completely rewritten setup wizard
